National chain pharmacies are the most common place to fill prescriptions in the US, with **43%** of the country's adults purchasing prescription drugs there as of July 2021. That figure

declined from **50%** in March 2019, while in-store, local/family-owned, and online pharmacies each grew in share by **2 to 3 percentage points**.

Where Do US Adults Purchase Their Prescription Drugs?

% of respondents, March 2019 & July 2021

Note: March 2019 n=1,105; July 2021 n=4,013
