

Most US Parents Believe Virtual/Distance Learning Will Hinder Their Child's Success

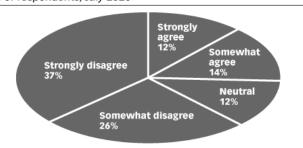

ARTICLE

Shelagh Dolan

As debate flares over the potential reopening of K-12 schools and universities this fall, 37% of US parents strongly disagree that their child would be just as successful with virtual/distance learning, while another 26% somewhat disagree, per July 2020 data from CivicScience.

% of respondents, July 2020

Note: compared with traditional/classroom learning; numbers may not add up to 100% due to rounding Source: CivicScience as cited on company blog, July 7, 2020
